

# Let's make Barcelona worth living in

Dear neighbour,

We all love Barcelona and want a clean and well-kept city. A city to enjoy. We are aware that one of our residents' main concerns is cleaning, as well as for the City Council: it is the contract where we allocate more money, almost 10% of the annual municipal budget.

We have worked on a new cleaning and waste collection contract, which, from March, will involve more staff and new electric vehicles that will reduce emissions and noise, among other improvements.

With the new contract we adapt to each neighbourhood's needs every moment and improve the channels through which residents can report incidents. Because only with everyone's involvement and co-responsibility can we take care of our city.

We take care of Barcelona. A city that takes pride in its inhabitants and enchants everyone who visits it. We will all have a cleaner and more sustainable city. A Barcelona to live in.

Cordially,

Ada Colau Ballano  
The Mayor of Barcelona

## Cleaning up

More resources in intensive use areas, green areas and squares

New fast response service

New continuous care service for public spaces

### At Vallcarca i els Penitents

Emissions and noise are reduced with an 85% electric fleet.

Our cleaning service includes water for the whole neighbourhood.

We reduce environmental impact by using groundwater.

We will expand and intensify green areas and bike lanes cleaning.

A total of 31 people and 21 cleaning vehicles are serving the neighbourhood.

## Waste

More frequency, fewer emissions and noise

More selective collection containers

More public space and better accessibility

### At Vallcarca i els Penitents

We included recollection of all kinds of plastics and metals that, from now on, can be deposited in yellow bins.

We increased paper and cardboard recollection.

We installed different sized containers for all streets.

We put 269 new containers and redistributed them to free up public space.

Help us keep the city clean!
